Entrust Educational Services DataControl Essentials Training

Course overview

Entrust DataControl™ Essentials training is a one-day course, delivered on-site or remotely, that prepares participants to install and configure the basic features and functionality of Entrust DataControl. The course includes hands-on labs, giving attendees actual experience with the product. At the conclusion, students will be familiar with the essential features of DataControl, including key management, encryption support, KeyControl lifecycle, VM encryption lifecycle, cloning support, troubleshooting, and backup/restore.

Day 1:

• Company and product overview
• Product architecture and KeyControl lifecycle
• Entrust KeyControl deployment
• WebGui and security administration
• Policy agent install
• VM encryption lifecycle
• Troubleshooting tips
• Backup/restore
• Maintenance

BENEFITS

• Maximize learning in minimal time through efficient, in-depth, instructor-led training

• Improve effectiveness of operations, support, and security team members to support implementation

• Gain hands-on experience with Entrust DataControl through easily accessed, hosted lab exercises

• Learn more about all available Entrust DataControl features to maximize future value of the product

DELIVERY APPROACH AND REQUIREMENTS

This course is delivered either on-site or remotely over one, eight-hour day. For remote delivery, students must have access to a computer connected to the internet. For on-site delivery, the customer supplies:

• Room large enough for students and instructor

• Projector

• Computers for all students

• Internet connection available to students and instructor
